STORMING DARKNESS "Pilgrimage" 7" EP

T.S.K! is ready to proclaim the beginning of 2014 a.b. with the most cursed release in history of the label! **STORMING DARKNESS** "Pilgrimage" was recorded in Autumn 2005 a.b. on the ancient reel-tape 4-tracker, being the very first recording of the band featuring live drummer. The precedent to "Sin-thesis" debut album of **SD**, this black jewel remain unreleased due to merciless raw production & unhyped nature of the artist until these days. This piece of black fanaticism is finally near to be unleashed: 45rpm 7" record is featuring obscurant artwork by Rev. Kriss Hades and will be coming with 33x33cm poster featuring the front & back art prints. This will be one-time pressing of 300 h/n copies on black vinyl only.

Listen in darkness on the highest volume level, better in headphones. Flat EQ/no effects is recommended for authentic envenomation.

WARNING: extremely ingenious! The recording contains the most necro sound & malefic rifting **SD** ever made. Be careful; could provoke mental disorders and/or uncontrolled religious hysteria.

SS-18 & ДО СКОНУ new albums approaching!

Lo! The heralds of Nuclear Age **SS-18** have finished the work on new full-length opus entitled "Nuklearpteryx"! By this record the band fluently surpassed their previous efforts, representing 8 intercontinental missiles charged with 666 megaton MIRV. This time the genius of Sadist is once again accompanied by the talent of Yag Mort, who created absolutely incinerating artwork for the glory of the Nuclear Phoenix! The album will be released in very special shape, limited to enormous amount of 418 copies, since such an exceptional piece of apocalyptic art is obliged to be available for some significant time!

DO SKONU do continue to explore the paths of black shamanism with "The Grand Awakening Among the Great Sleep". The band already recieved certain recognition in the underground with 2 utterly convincing albums, but their new record do expand the ideas put into the "Serpentine Circle" MCD released by **T.S.K!** in 2013 a.b. My first impression after hearing the material was "it's "Total Death" under Amanita Muscaria", however, that may be just delusions of my inflamed consciousness. The album will be released as humble digibook limited to 333 copies. Artwork spawned by Artem Grigoryev of Black Typography.
